**Q5 Overall Opinion (DWR's Draft Decision on Boundary Modification Request)** **Oppose**

---

**Q6 Which basin does your comment apply to?** **1-004 SHASTA VALLEY**

---

**Q7 Provide comment here:**

The basin boundary as per bulletin 118 did not take into account much of the area of the Shasta Valley. It shows an irregular alluvial area, likely representing older models of groundwater science. The basin must be expanded to include the east and southeast areas where much of our groundwater originates from volcanic deposits. We can't study half a basin, we need the boundary to be expanded so that scientific research can be done in a holistic way. Using current research methods, the basin will be much better characterized, thus easier to manage sustainably as per California groundwater management law.
